THE ISRAEL EXPORT &
INTERNATIONAL COOPERATION INSTITUTE

THE ISRAEL EXPORT AND INTERNATIONAL COOPERATION INSTITUTE

The Israel Export and International Cooperation Institute is your premier gateway for doing business with Israeli companies. Established and funded by the government and the private sector, IEICI's expertise in technology and product scouting, joint ventures and strategic alliances with Israeli companies spans more than half a century. Whatever your field is, IEICI offers access to relevant businesses and government resources. IEICI will provide the information you need to connect, negotiate and do business all over the world. On behalf of the Israel Export Institute I would like to invite you to review this catalog of leading Israeli companies that will participate in our delegation to Hannover Messe.

Israel is gaining expertise and recognition in the field of Industry 4.0. Companies from around the world are turning to Israel to solve complex issues, attend conferences, and meet startups. This situation

is ideal for Israeli companies, which possess inventive solutions to support the industry's changing landscape. The sector covers solutions such as: Operations Optimization, Robotics, Inspection&Testing, Maintenance, 3D Printing and Cyber Security.

Karin Chen - Head of Sectors- Automotive & Smart
Mobility; Industry 4.0 | Int'l Organizations

Ministry of Economy and Industry
Foreign Trade Administration

FOREIGN TRADE ADMINISTRATION, MINISTRY OF ECONOMY & INDUSTRY

The Foreign Trade Administration (FTA) at the Israeli Ministry of Economy and the Industry manages and supports Israel's international trade and trade policy.

Through its headquarters in Jerusalem together with more than 40 economic and trade missions in key financial centers throughout the world, the FTA works tirelessly to promote Israel's economy on a global scale.

The FTA operates a network of economic and commercial attaches around the world, who constitute the operational-diplomatic arm of the Ministry in overseas markets and provide a wide range of services to Israeli companies and the international business community.

3d Signals bridges the connectivity gap and enables transparency of production floors for data-driven decision-making to improve manufacturers' business KPIs. By placing non-invasive sensors on machines, we record their status and transmit the information to a data acquisition platform and upload it to the cloud. Our customers proved our solution to improve machine availability and productivity by 30% within 3 months of installation.

Feelit Technologies Ltd. is an Industry 4.0 company operating in the field of Predictive Maintenance. The Company has developed a patented nanomaterials ink-based sensing technology, combining a printed sticker sensor and proprietary analytics, that can detect parameter changes in industrial systems, providing value to users through improved uptime, as well as reduced asset cost of ownership, and safety risks.

www.feelit.tech

NanoScent is a startup offering its novel VOCID range scent recognition solutions for healthcare, food & beverage, and chemical and energy industries for quality control and process monitoring at the PPB level. For example, with VOCID Purity, you can monitor gas line cleanliness in-line by having a reference level which is established by exposing the a sensor to a clean line.

Newsight develops advanced image sensor chips & solutions for two business units: Machine Vision and Spectral Analysis. Our 3D machine vision depth sensors serve verticals such as Industry 4.0, Automotive Safety & AV, Robotics, and more. Newsight leverages years of experience in chip design to provide high-quality, accurate, small-sized sensors at an unbeatable price, enabling advanced sensing technology for high-volume markets.

Seebo enables manufacturers to unlock the full potential of their production processes - maximizing efficiency and reducing losses in areas such as waste, quality, throughput, energy efficiency, yield, and emissions.

The Seebo solution delivers clear recommendations to manufacturers - including the optimal process set-points and ranges, along with real-time alerts to prevent inefficiencies and production losses before they happen.

Seebo is used by leading manufacturers including Nestle, Mondelez, ArcelorMittal, GKN and Pepsico.

 www.seebo.com

IoT cyber security software solution provider, enabling IoT service and solution providers to monitor and secure mass-scale B2B IoT/IIoT networks, reduce operational costs and generate new revenue streams. Based on over 15 years of research (MIT) and 80 academic papers, Shield-IoT patented technology delivers the world's first coresets-AI anomaly detection solution to enable accurate analytics at mass scale.

www.shieldiot.io

A software company that presents a new generation of accurate and robust augmented reality (AR) technology that is specially designed for Automotive and industrial OEM's, Line Builders and Tier -1 suppliers to keep their digital twin aligned with their products and assets during production phases

VZ enables ad-hoc factory upgrades, optimizes performance, guarantees availability and quality. Quickly and efficiently reduces waste and energy consumption, automates manual tasks, increases yield, and prevents machine downtime. Autonomous Sensors are a whole in-one-solution, immediately available for technicians and plant managers. Superior laser sensing performance, cost-efficient, versatile, and smart.
