

The Freedom to Embrace Any Digital Asset

The Ability to Thrive in the Digital Economy

EXCHANGES, BROKERS, AND OVER-THE-COUNTER (OTC) DESKS

Exchanges, digital asset liquidity providers and brokers rely on Curv to securely manage and trade all types of digital assets. Curv can be integrated through the back-end as a replacement for both hot wallets and the cold wallet physical infrastructure. Transactions can be initiated and approved either manually by employees and/or programmatically by machines.

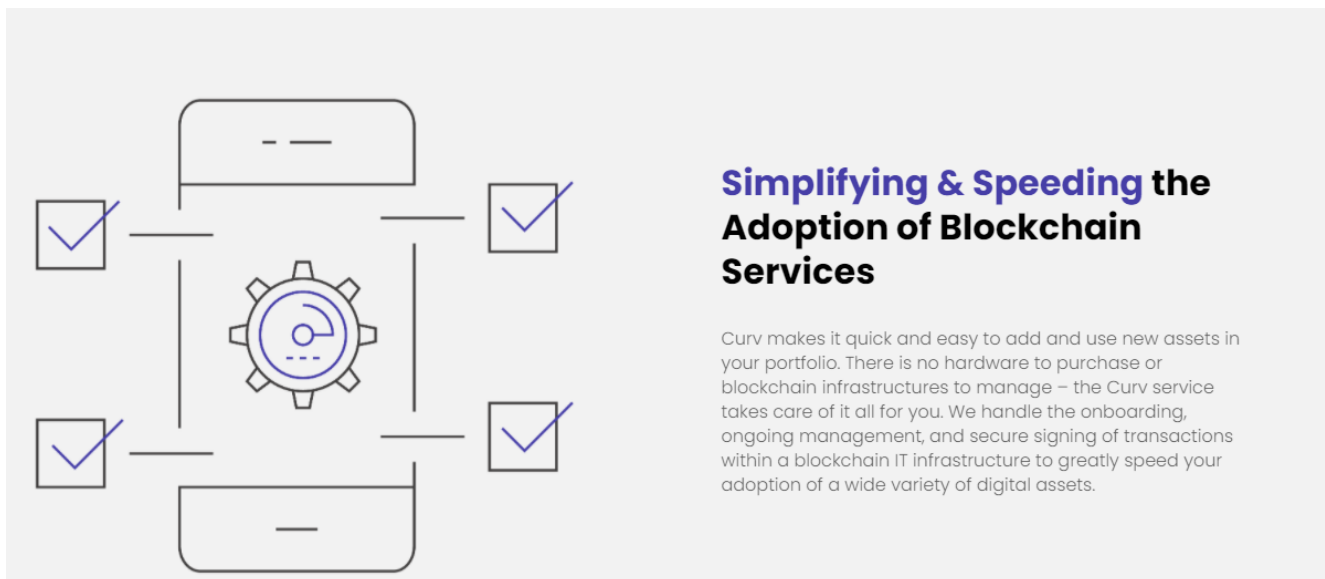

DIGITAL ASSET FUND MANAGERS

Hedge funds, venture capital firms, and other asset managers use Curv to securely hold digital assets, short and long-term. Shares can be stored on any employee device that has the authority to manage or approve transactions. A single portal can be used to manage all the wallets for all the digital assets.

CUSTODIANS, BANKS, & FINTECHS

Fiat custodians entering the digital asset space choose Curv to securely manage all their digital assets. With Curv, they can offer clients total control, bulletproof security, and instant availability, as well as operational savings by offloading the implementation and ongoing management of asset-specific infrastructures.

Simplifying & Speeding the Adoption of Blockchain Services

Curv makes it quick and easy to add and use new assets in your portfolio. There is no hardware to purchase or blockchain infrastructures to manage – the Curv service takes care of it all for you. We handle the onboarding, ongoing management, and secure signing of transactions within a blockchain IT infrastructure to greatly speed your adoption of a wide variety of digital assets.
